CONEMAUGH HEALTH SYSTEM

EMT
Transition & Refresher

In 2009, the NHTSA released the EMS Education Standards for all levels of EMS. The Educations Standards define the competencies, clinical behaviors, and judgments that must be met by entry-level EMS personnel to meet practice guidelines defined in the National EMS Scope of Practice Model. To reflect this needed change in knowledge, the EMS Certification Levels have changed. The EMT-Basic now becomes and EMT. This is not just a name change, but a change in what an EMS provider is expected to know at an Entry Level.

What does this mean for you? Well if you are a NREMT EMT-Basic, you must transition over to the EMT level. To do this, you must meet complete a course that is approved by the State. Completion of this 36hours course meets that requirement and also meets your Continuing Education requirements for the Commonwealth of Pennsylvania. If you are not a NREMT, this is your opportunity to update your knowledge base to the current entry level expectations of an EMT. The Transition Course will reflect changes to all categories of the EMS Education Standards.

If you attend each class, you will receive a certificate of completion indicating you have completed the 36 hour EMT-B to EMT Transition Course. If you can only attend a few sessions, you will receive credit for the session(s) you attend.

This course will be live at CMMC, and Webinar access is from your own computer is available.

Course Fees:

Entire Course	$50.00	Individual sessions	$10.00 per session

Pre Registration is required.

Recommended Textbook is EMT Transition Manual: Bridging the Gap to the National EMS Standards (ISBN 978-1-4496-0915-3) Cost is $60.00 through the School of EMS.

All classes are held from 1800-2200. Individual course session # are in parenthesis. CE hours to the right.

October 1, 2013	Preparatory	(004723)	4h Other
