

Because every patient deserves the best care...

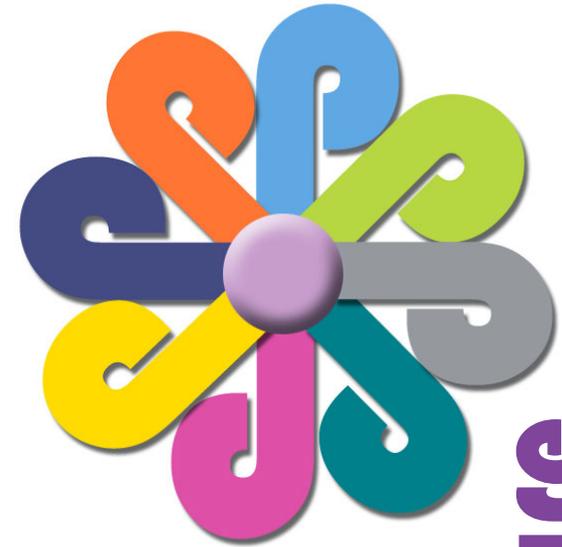

## I Am Every Patient

Your support helps us meet the “**greatest patient needs**” through the Conemaugh Health Foundation for generations to come. “**I Am Every Patient**” reminds us all that what we support is very personal. It’s all about the patient, and each of us can become a patient at any time. Through our gifts of time and money, we can all stand for and represent every patient in need.

Linked Together in the Fight Against Cancer

What is

# hope support cure

Hope Support Cure represents the ten most diagnosed cancers within the Conemaugh Health System.

## Our Hope for a Cure

The circle in the center of the logo is the color lavender and represents all cancers. Others most prevalent in our area represented are:

- Breast - Pink
- Colorectal - Royal Blue
- Brain/Lung - Grey
- Prostate - Blue
- Bladder - Yellow
- Lymphoma - Lime Green
- Skin/Leukemia- Orange
- Gynecological - Teal

These cancers are also among the top ten diagnosed nationally. **We encourage you to participate in preventative screenings where possible and be knowledgeable about cancer risks and symptoms.**

Ask us about our cancer pins and other items that help us raise awareness, remind us of the need to get screened and help provide funding.

## A Celebration of Life

Each year we celebrate the lives of those who teach us the power of support and hope. We gather survivors and caregivers and celebrate their lives while also honoring those who lost the battle with cancer at a yearly "Awareness Brunch". The educational event stresses the importance of early detection through screening and is coupled with light entertainment and prizes. Our **hope** is by working together we can **support** our patients fighting cancer with a future wish for a **cure**.

## How You Can Help!

Through donations to the Conemaugh Health Foundation for our greatest patient needs, things such as meals during chemotherapy and transportation to treatments, and in some instances provide medications until treatment and medications begin. Fundraising efforts by students, community events, and donations have made a difference in the needs of our cancer patients.
