

Palo Alto VPN Client install

Download the file, GlobalProtect64-5.2.8.msi, from Teams - Cone-MIS Department - General - Files - Palo Alto folder

Run GlobalProtect64-5.2.8.msi

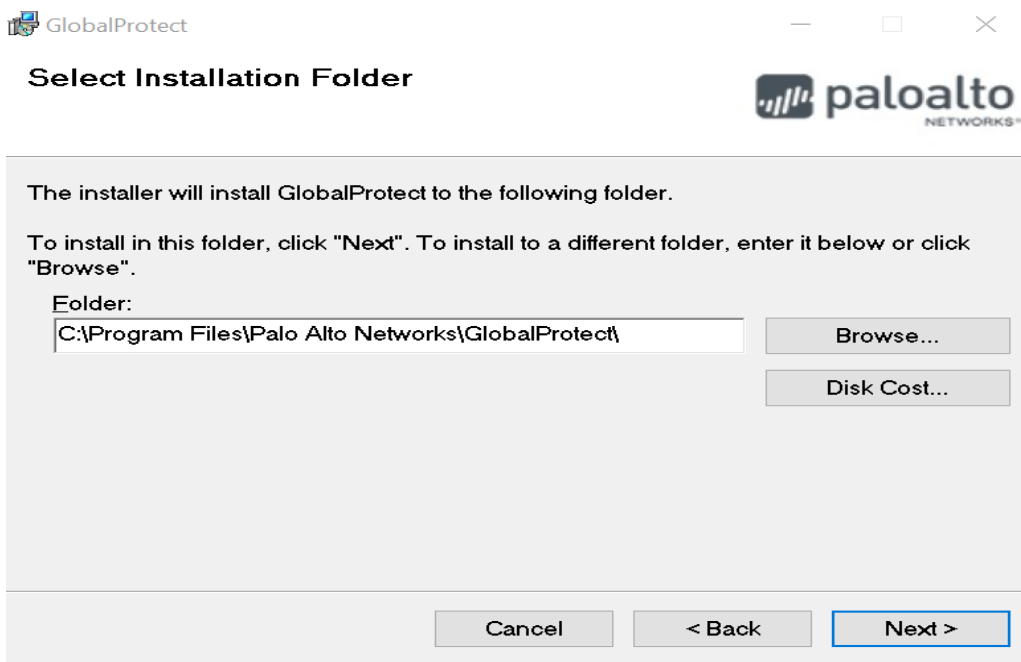

Click Run

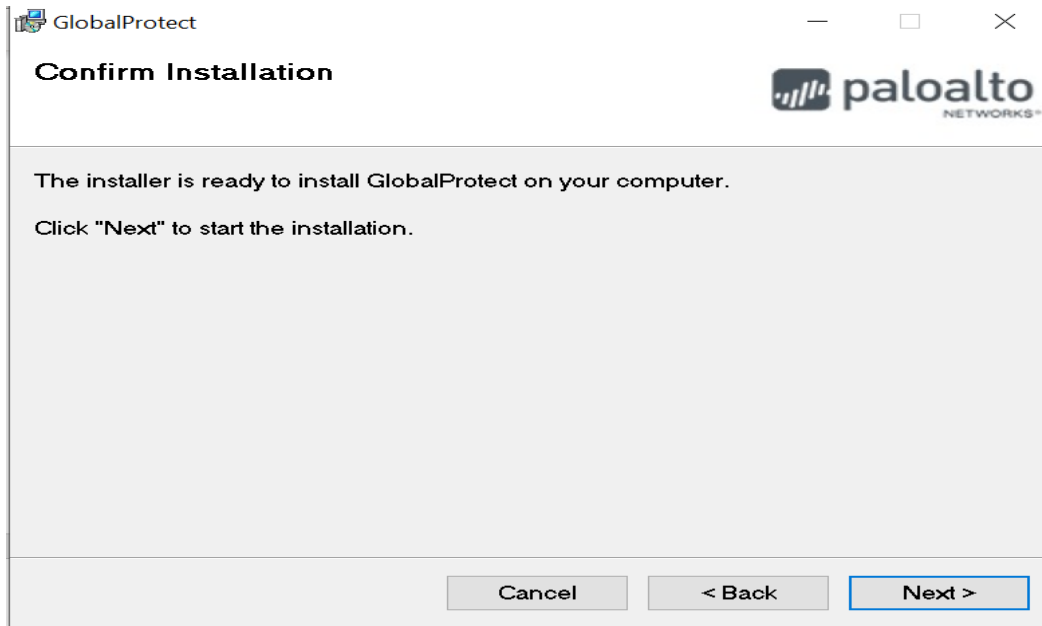

Click Next

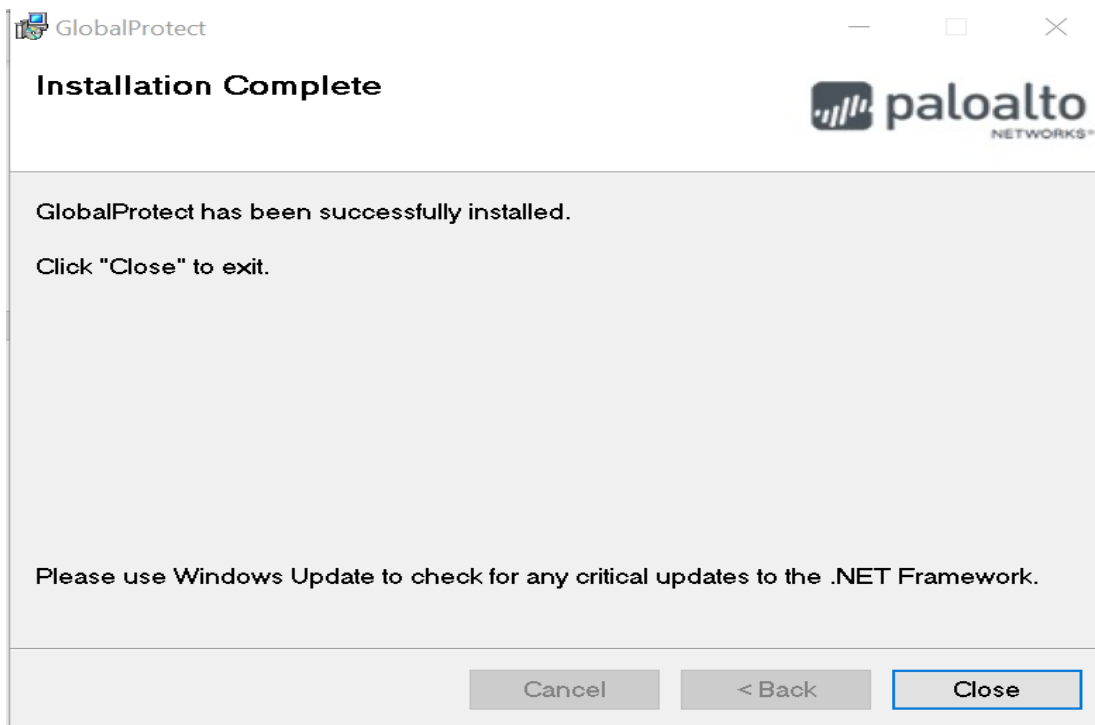

Click Next

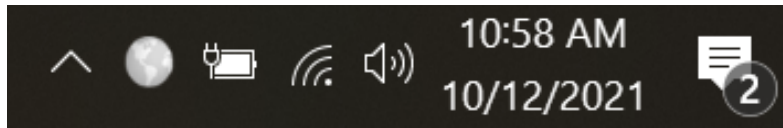

Click Next

Click Close. Client is installed.

On the taskbar, by the time you should see a earth icon, you may have to clock the up arrow.

Clicking on the earth will bring up the Screen below. We believe you will enter connect3.conemaugh.org and click connect.
